Base Cabinet Modifications

For special width cabinets between standard sizes – use the next largest standard size.

For **special width cabinets wider than standard** – add 15% (Stonebridge) or 10% (Custom) to the price of the widest standard cabinet for every 3” increase in width. 60” maximum width.

For **special height cabinets between standard sizes** – use the next largest standard size and add \$100.00 in the accessory column.

For **special height cabinets taller than standard** – add 15% (Stonebridge) or 10% (Custom) for every 3” increase in height, added to the tallest standard cabinet.

For **special depth cabinets between standard sizes** – use the next largest standard size.

For **special depth cabinets deeper than 24”** – add 15% (Stonebridge) or 10% (Custom) of the standard 12” deep cabinet for every 4” increase in depth.

Finished interior means the interior of the cabinet is finished in the same wood species and color as the exterior and the shelves are 3/4” thick plywood. Add 25% of the cabinet price. If doors are deleted, no up charge for finished interior.

Finished interior backs, when using Series 310 or Series 3000, will be MDF core plywood.

To change the configuration of the door or drawer arrangement on a cabinet is considered a facing change as long as the overall size of the cabinet remains the same.
